📍 Kuala Lumpur, Malaysia (Open to relocation)

EXPERIENCE

Hitachi eBworx

Applications Engineer Intern

📅 03/2021 - 09/2021

- **First:** Developed banking and financial applications for banks
- **Second:** Developed banking and financial applications for banks
- **Third:** Developed banking and financial applications for banks

Universiti Putra Malaysia

Teaching Assistant

📅 01/2019 - 06/2019

- Tutored 2nd-year university students in Operating Systems (Linux)

EDUCATION

Universiti Putra Malaysia

Bachelor of Computer Science

📅 09/2017 - 09/2021

CGPA: 3.88 / 4.00

OTH Regensburg

Exchange Semester

📅 10/2019 - 02/2020

ECTS: 25

PROJECTS

Visual Analytics for Land Use/Cover Change (Thesis)

🔗 <https://github.com/jasonwvh/landcover-analytics>

- Classified satellite images into distinct land covers with QGIS and Python's GDAL, Scikit-Learn, and Keras libraries
- Developed an interactive web app with React.js, Node.js, Express.js, using MongoDB to store geospatial data, and MapBox to visualize the changes.

Image Hostr

🔗 <https://github.com/jasonwvh/aws-hostr>

- Image hosting site with REST APIs on Spring Boot and front-end with React.js, using Amazon S3 for image storage.

Pythagoras e-learning

🔗 https://github.com/jasonwvh/pythagoras_dev

- Lead developer in a serverless e-learning platform with fully functional CRUD operations, built on React.js and Amazon Amplify.

ArchBuddy

🔗 <https://github.com/jasonwvh/archbuddy>

- Serverless AndroidX application written in Kotlin and deployed on Firebase with fully functional CRUD operations, image support, and GPS tracking.
